

Harris Academy, Croydon

Employed by Willmott Dixon under a NEC Design & Build Contract, Acorn MPS took the outlined RIBA stage 3 design specification for the Mechanical, Plumbing and Public Health Services through the pre-construction, design and construction phase to stage 7 (in use).

Using the latest design methods, IES Thermal Modelling and REVIT we assisted the client in achieving a first-class environment and BREAM excellent rating.

With early engagement at the tender stage and as lead co-ordinator we produced a fully co-ordinated REVIT model for all the services installed within the building minimising installation problems and allowing the pre-fabrication of certain parts reducing installation time on site.

Mechanical Services Installed included

- LTHW Gas Fired Heating Boilers
- Heating Pipework, Radiators and Underfloor Heating
- AHU's and Ventilation Ductwork
- Air Conditioning
- Domestic Hot and Cold Water
